

MOORUNGA ANGUS

On Property Bull Sale

Friday 25th August 23 - 1pm

AuctionsPlus

80 Old Moorooduc Rd, Dromana, VIC.

Reference Sires

Millah Murrah Paratrooper P15

Sire of Lots 5 & 6

Paratrooper needs no introduction. He's broken most records from his purchase price of \$160,000 to his progeny topping at \$280,000. To quote Ross Thompson "He is certainly the best breeding bull we've used.

Consistency is remarkable, progeny all look the same, and just like him. Beautiful body shape and phenotypic balance, with outstanding visual carcass. He's a once in a generation Sire"

William of Stern

Sire of Lots 7, 10, 11, 23

This New Zealand bred sire is not well known in Australia but has done an exceptional job at Moorunga. All his progeny have exceptionally good feet and an amazing quiet but curious nature. They're soft, deep and have plenty of carcass.

William of Stern is in the top 10% EBV's for Rib & Rump Fat & Docility.

Moorunga has retained straws in Lots 10 & 11 for in herd use.

Matauri Reality 839

Sire of Lots 8 & 20

A legend of the breed!

Reality is a New Zealand bred sire that has proved himself in over 220 herds, with over 5000 progeny analysed. He's in the top 10% of the breed for all calving traits as well as Rib & Rump Fat. Reality is in the pedigree of many of the breeds best cows, including at

Moorunga. His progeny are function & fertile with a smooth shoulder set. A rare opportunity to purchase a son as straws are hard to find.

Buyers Information

Pre Sale Inspections

Our Open Day will be held on Friday 4th August from 10am to 4pm.

For those unable to attend, inspections are welcome by appointment.

All bulls will be on display from 10am on Sale Day.

Auction will start at 1pm in conjunction with Auctions Plus (Online bidding platform)

Auctions Plus

For those wishing to bid via Auctions Plus, please register at www.auctionsplus.com.au prior to sale day.

Health

All bulls have been tested Negative for Pestivirus. (All animals on Moorunga are tested)

Bulls have been vaccinated with Pestigard (Pestivirus), 7in1(5in1 plus Leptospirosis),

Vibrovax (Vibriosis) and drenched with Ivomec Plus prior to sale.

Moorunga is a J-Bas 6 property. All bulls will be semen tested prior to sale.

Moorunga Angus Guarantee

All sale bulls have been DNA tested and Parent Verified.

To the best of our knowledge the bulls on offer are in sound working order at the time of sale. If a bull becomes infertile or breaks down due to reasons other than injury or misadventure, at any time in the 12 months following sale, Moorunga Angus will either:

a: Replace the bull (if a suitable bull is available)

b: Issue a credit (equal to the purchase price less any salvage value of the bull) for use at Moorunga within a 12 month time frame.

Note: In some cases a veterinary certificate may be required. Normal care and good

husbandry practices must be observed as a replacement/credit is not available if the bull is injured or dies.

The guarantee covers the purchase price, without interest, costs or damages.

Outside Agent Rebate

A 3% rebate will be paid to outside agents, introducing a buyer and settling within 7 days.

Catering

Complementary morning tea and lunch will be available on Sale day.

Bull Delivery

Elders and Moorunga will assist purchasers in arranging transport. Please leave delivery instructions when signing out.

Please note: No bulls will be available to be picked up on sale day.

Insurance

We highly recommend insuring your bull for 12 months from fall of the hammer to cover injury, transit cover & death. All due care will be taken with bulls while being held for delivery but we take no responsibility for injuries incurred during this time. Please talk to an Elders agent on the day.

Safety

All our bull are quiet under normal conditions but care must be taken on sale day as crowd pressure may change their behaviour. They have all been run in a group environment so are not used to being alone.

All visitors enter the bull display area at their own risk . Children are not permitted in the bull display yards. Staff will be available if you would like someone to accompany you through the pens.

Recessive Genetic Conditions

All animals in this sale are free of AM, NH, CA & DD by parentage or testing.

Welcome

Welcome to Moorunga's 2nd Annual On Property Bull Sale!

We are proud to present these 27 young sires created by some of Australia and New Zealand's best known AI sires and our Banquet walking herd sires. They are bred from some great dams, sourced from around Australia and grown on a property known for some of the best pastures on the Peninsula.

There is plenty of variation in mature size and muscle pattern to suit most production systems.

The majority of the bulls are ready to go to work but some of the younger bulls would suit an operation wanting to use a bull lightly or in a few months time.

A supplementary sheet will be provided on sale day with weights, scans and any withdrawals. This will also be available on Auctions plus and www.moorunga.com

About Us

John & Sue Matthies have been breeding cattle for nearly 50 years.

John established Looragoo Murray Grey Stud at Clyde, South East of Melbourne in 1974 and for the next decade bred cattle that achieved Champion and Grand Champion status at Melbourne, Adelaide & Sydney Royal Shows as well as the then prestigious Murray Grey National Show & Sale at Wodonga achieving the top average price for bulls for four consecutive years.

Following the stud's dispersal in the mid 1980's, John & Sue continued their farming at Buffalo in South Gippsland and a 3000 acre property, Clifton at Anakie near Geelong.

They were fortunate in 2013 to purchase a 700 acre property, Moorunga at Dromana on the Mornington Peninsula which had been owned by the Brockhoff family for 79 years.

In 2018 they established Moorunga Angus Stud, purchases have been made at the Anvil, Ireland & Stoney Point Dispersal Sales.

In early 2021 they recruited Glenn & Susie Trout as Stud Managers and have since made the judicious purchases of females from Texas, Little Meadows and Banquet Studs with emphasis on structure, femininity, milking ability and docility.

We are proud of the bulls we are offering at 2nd Annual Bull Sale and believe the genetics on offer are the equal of any available in Australia at the current time.

The suffix displayed at the end of each animal's name indicates the DNA percentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA

SV : the sire has been verified by DNA

DV : the dam has been verified by DNA

: DNA verification has not been conducted

E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

Attention Buyer Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

Comments: Geddes S42 is a 2yo calving ease sire out of a moderate dam with a magnificent udder. He's been joined to twenty-five heifers at Moorunga in June/July 23. Varilek Geddes has been used by major stud's such as Texas Angus as a calving ease, outcross sire.

Comments: Spartacus is a great option for cow mating. At almost 2yo, he's powerful and has plenty of performance, all in a very sound package. Shown at Berwick - 1st place and Red Hill Show 23 - Supreme Champion Bull. A strong footed bull with a little more frame, muscle and bone.

Comments: Moderate, soft and stout! Great carcass qualities in an early maturing package. His dam was a high performing, clean made cow with a great udder and Beastmode is a low birth weight, carcass sire. T36 is a calving ease bull with early growth, performance and an awesome nature.

Comments: Stud sire potential! T38 is a great combination of the legendary Paratrooper & the great Dream family. L94 is a deep bodied, strong footed matron. We love this bull for his pedigree, phenotype & docility. EBV's: nine traits in the top 10%. Moorunga is retaining a semen share for in herd use only.

Comments: Full brother to Lot 5. He has many of his brothers' attributes including his soundness, type and muscle pattern. You can't go wrong with this combination - a record-breaking sire and an awesome dam that is quiet, soft & deep with lots of eye appeal. She's added frame and bone to the mating.

Comments: T-Rex is a quiet, sound, easy doing youngster with great body capacity and good feet. His dam is a reliable breeder, selling a bull in last year's bull sale for \$7000. This is the first of our William of Stern sons to sell, they are all so structurally sound! T21 is heavily New Zealand influenced.

Comments: Taipan is an extremely quiet, sound young bull with good feet and sheath. He's out of a magic old cow from the Omnia line that we purchased from Texas Angus in 2021 as Lot 2. She's extremely deep and thick and has previously sold sons to \$18,000. Brad Pitt is a calving ease bull with a great phenotype.

BRINGING YOUR NEW BULL HOME

WHEN PURCHASING A BULL, CARE AND HANDLING AFTER THE SALE CAN BE AS IMPORTANT AS THE PURCHASE ITSELF. LOOKING AFTER YOUR BULL WELL DURING THE INITIAL STAGES OF HIS WORKING LIFE MAY ENSURE LONGEVITY AND SUCCESS WITHIN YOUR BREEDING HERD.

PURCHASE

Temperament is an important characteristic when selecting a bull. Selecting a bull that may be flighty or aggressive will make life difficult for you each time he is handled. Note which bulls continually push to the centre of a mob, run around, or are unreasonably nervous, aggressive or excited.

At the sale, note any changes of temperament by individual bulls. Some bulls that are quiet in the yard or paddock may not like the pressure and noise of the auction and become excited. Others that were excited beforehand get much worse in the sale ring and can really perform. Use the yard or paddock behaviour as a guide, rather than the temperament shown in the ring.

DELIVERY

When transporting your new bull insurance against loss in transit, accidental loss of use, or infertility, is sometimes provided by vendors. Where it is not, it is worth considering. After purchase tips:

- When purchasing, ask which health treatments he has received.
- Treat and handle him quietly at all times - no dogs, no buzzers. Talk to him and give him time and room to make up his mind.
- With more than one bull from different origins, you must be able to separate them on the truck.
- Make sure that the truck floor is covered to prevent bulls from slipping. Sand, sawdust or a floor grid will prevent bulls from being damaged by going down in transit.
- If you can arrange it, put a few quiet cows or steers on the truck with the bull. Let them down into a yard with the bulls for a while before loading and after unloading.
- Unload and reload during the trip as little as possible. If necessary, rest with water and feed. Treat bulls kindly your impatience or nervousness is easily transmitted to an animal unfamiliar to you and unsure of his environment.

IF YOU USE A PROFESSIONAL CARRIER:

- Make sure the carrier knows which bulls can be mixed together.

- Discuss with the carrier, resting procedures for long trips, expected delivery time, truck condition and quiet handling.
- Give ear tag and brand numbers to the carrier and make sure you have the carrier's phone number.
- If buying bulls from interstate, organise any necessary health tests before leaving and work out if any other requirements must be met before cattle can come into another State.

When buying bulls from far away, you may often have to fit in with other delivery arrangements to reduce cost. You should make it clear how you want your bulls handled.

ARRIVAL

When the bull or bulls arrive home, unload them at the yards into a group of house cows, steers or herd cows. Never jump them from the back of a truck directly into a paddock—it may be the last time you see them. Bulls from different origins should be put into separate yards with other cattle for company.

Provide hay and water, then leave them alone until the next morning.

The next day, bulls should receive routine health treatments. If they have not been treated before, all bulls should be vaccinated with:

- 5-in-1 vaccine;
- vibriosis vaccine;
- leptospirosis vaccine (if in areas like the Hunter where leptospirosis exists);
- three-day sickness vaccine (if in areas where this sickness can cause problems).

Give particular attention to preventing new bulls bringing vibriosis into a herd. Vibriosis, a sexually transmitted disease, causes infertility and abortions and is most commonly introduced to a clean herd by an infected bull. These bulls show no signs of the illness. Vaccinated bulls are free from vibriosis, so vaccinating bulls against the disease should be a routine practice.

Vaccination involves two injections, 4-6 weeks apart, at the time of introduction, and then a booster shot every year. Complete the vaccinations 4 weeks before joining.
